

AUKŠTAS SLĖGIS - jungtys ORFS

Jungtys SAE - J51453 (ORFS)

ORFS jungtys yra naudojamos hidraulinių nelanksčių vamzdžių sujungimui arba prijungimui. Vamzdžių kraštai atlenkti 90° kampu. Sandarinimas įvyksta suspaudus žiedą, esantį priekinio jungties su išoriniu sriegiu plokščiojo paviršiaus griovelyje. Jungtys taip pat gali būti derinamos su lanksčių hidraulinių žarnų apkaustais (pvz., TI-ZOW110, ZOZ110 tipas).
